Market Reef DXpedition 1990

During this expedition OH2AP/OJO and SI8MI from the Swedish side of the reef were QRV simultaneously by the radio clubs of the sister towns Järvenpää in Finland and Täby in Sweden.

A great many of Baltic Grey seals (*Halichoerus grypus*) live in the area around Market Reef. In spite of the cessation of hunting seals are still dying due to degradation of the environment. Now is the time to fight for the protection of the Baltic Sea and its seals. The photo is from the book "Ajojäällä syntynyt" (ISBN 951-9026-09-6) by Seppo Keränen.
